

Dale® Bridle™ Anti-Disconnect Device

Clinical Advantages

Features

Benefits

Clinical Advantages

Secures Breathing Circuit To Tracheostomy Tube

- Designed to prevent accidental disconnects
- Does not restrict movement of swivel adapters
- Reduces undesirable movement that could compromise tracheostomy tube placement

- Alleviates patient and family anxiety of accidental disconnect
- Clinician is not interrupted from daily duties to replace vent tubing to trach tubing
- Healthcare worker is not exposed to secretions

Trouble-Free Monitoring

- When combined with Dale Tracheostomy Tube Holder, creates stable, trouble-free securement system
- Designed to allow quick, access to site when necessary
- Helps reduce the number of "false" monitor alarms

- Enhances recovery by assuring a secure breathing circuit to the airway
- Enhances patient safety
- Gives nurse and patient a sense of confidence

Convenient Size

- Adult and Pediatric sizes

- Fits all adapters and closed tracheal suction systems
- One piece construction

Velcro® Fastener Tabs

- Ensures secure connection of tracheostomy tube to breathing circuit
- Quickly applied and easily removed, even while wearing gloves
- Fungus resistant coating

- Quick and easy to tighten or loosen
- Can make manipulation of the breathing circuit a one person procedure
- Reduces the likelihood of infection at the stoma site

Latex-Free

- Eliminates patient and care-giver latex reactions

- Prevents latex hypersensitivity
